

LARGE CAPACITY CLASSIC CONTINUATION

BTC-80

Commercial Fully Automatic Coffee Machine

BTC-80 Cost-effective Commercial Machine

The brand-new design with large-capacity water tank, bean hopper and coffee grounds box allows the coffee machine to be able to operate for a whole day without interruption. It's also comes with various performance upgrade: the new design of milk system, easily adjust to your preferred milk temperature; optimized coffee pipe line ensures every cup of pure fresh coffee without impurities, and the mouth is full of aroma. BTC-80, your classic and reliable coffee machine.

FEATURES

HIGH EFFICIENCY

With dual thermoblocks and dual pumps, milk foam and coffee can be made simultaneously, serving high efficient Cappuccino/Latte.

STABLE PRODUCTION

Continuous extraction with cup volume deviation $\pm 5\%$ and coffee temperature deviation $\pm 3^\circ\text{C}$, the foam temperature can reach 65°C .

UPGRADED AND INNOVATION OF THE MILK FROTH SYSTEM FOR A DELICATE AND SMOOTH EXTRAORDINARY EXPERIENCE

The upgraded and innovation of the milk froth system by free adjustment of the milk flow, provides the extraordinary experience of delicacy and smoothness from a high-quality and high temperature milk froth.

EASY OPERATION

Beverage preparation: 7" color touch display helps prepare the beverages efficiently with one touch and adjust the parameters of the beverages flexibly.

Cleaning and maintenance: The machine rinses itself when turned on or off. Cleaning and maintenance are recommended based on usage frequency, with intelligent reminders.

TECHNICAL ADVANTAGES

ACCURATE GRINDING

The self-developed high-precision grinding system adopts imported metal cone cutters, which are suitable for coffee beans with different roasting degrees. The particle size of the grinding powder is uniform, and the grinding efficiency can reach 1.9g/s.

ROBUST BREWING UNIT

The professional brewing system developed can reach 7 bar of extraction pressure and over 19% extraction rate.

CONVENIENT AND INTELLIGENT RINSING SYSTEM

The intelligent rinsing system completes the rinsing automatically before and after the coffee is brewed. The water rinses internal pipelines and components, ensuring each cup of coffee is fresh and tasty.

IoT CLOUD (OPTIONAL)

Coffee Cloud offers you a comprehensive coffee machine management solution: real-time equipment status monitoring, beverage statistics tracking, malfunction events recording, operation and maintenance management, online batch beverage customization and remote Ad contents switching.

		BTC-80
Recommended Daily Output		80 cups
Specifications	Screen type	7" Screen
	Bean hopper capacity	750g
	Brewer capacity	7-14g
	Water tank volume	6L
	Drip tray capacity	2L
	Waste bin full (counter)	50 portions
Technical Specialities	Adjustable coffee spout	75-155mm
	Thermoblock quantity	2
	Pump quantity	2
Other Options	Built-in water filter	Optional
	Fixed water supply	Optional
	Automatic drainage	Optional
Water Supply		Barrelled water + Tank water+ Fixed water
Power Connection		220-240V/50-60Hz
Rated Power		3100W
Weight	Net weight	20kg
Dimensions	D*W*H (Depth*Wide*Height)	559*391*572mm
